Frequently Asked Questions

Security Description | DES <GO>

DES <GO> provides a broad, comprehensive range of equity information in one place. You can use DES to access consolidated financial data and fundamental background information for a specific stock, warrant, mutual fund, equity option, synthetic option, or exchange-traded fund (ETF).

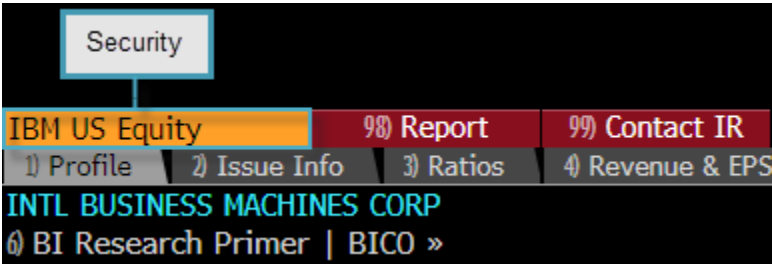

The DES screen that appears varies depending on the selected security type. This Help Page explains how to use DES for public equities. For more on using DES for other equity securities, see the following Help Pages:

Equity Options	Equity Warrants
Exchange Traded Funds (ETFs)	Private Companies
Private Equity Custom Securities	Private Equity Funds
Private Equity General Partners	Private Equity Limited Partners

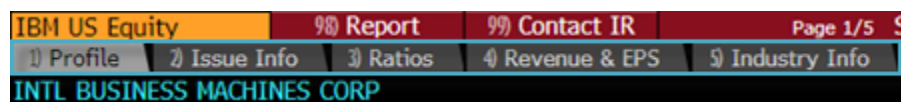

Quick Start

- 1. Start typing the <Eqty> security you want to analyze, then select it from the list that appears.

2. Select a tab to begin your analysis.

Note: The tabs that appear depend on the type of security you have loaded.

For more: [Tab Descriptions](#).

Getting Hints as You Go

On any Bloomberg function, you can mouse over key items for more information:

Tab Descriptions

Depending on the type of <Eqty> security you have loaded, the following tabs may appear:

- **Profile:** Get a brief description of the company and a snapshot of key data such as share price, earnings, dividends, and management.
- **Issue Info:** Find the company's exchange and identifier information, as well as see its public offering history and primary holders.
- **Ratios:** See the price and earnings ratio and other performance data for the company.
- **Revenue & EPS:** Get a breakdown of the company's historical comparable revenue and comparable earnings per share (EPS) performance to analyze the company's recent performance and identify relative regional and segment strengths and weakness.
- **Industry Info:** See key data, research, and themes to analyze a company's competitive position within an industry.
- **Portfolio:** Analyze the size and nature of the firm's investments and analyze its portfolio by region and sector to understand more areas of focus and exposure for the firm.

Note: This tab only appears for publicly traded private equity firms.

- **Receipt Info:** Get a summary of key data specific to receipt securities to compare receipt data to the equivalent data for the underlying security.

Note: This tab only appears for depository receipt securities (such as ADRs).

Workflows

Contacting IR Officers

You can contact a company's investor relations officer directly from the toolbar on DES, which helps you quickly integrate idea generation with your due diligence process.

Steps:

- 1. On the toolbar, click the **Contact IR** button.

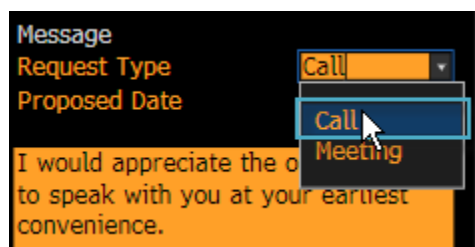

The *Contact Investor Relations* window appears.

- 2. Enter your contact details and company specific information in the *Sender and Firm Details* sections.

A screenshot of the 'Contact Investor Relations' window. The window has a dark background with light-colored text. At the top, there is a header bar with the title 'Contact Investor Relations'. Below the header, there is a section for the recipient, 'To: Ellen West, VP: Investor Relations, Smith & Smith', with icons for a person, a phone, and a calendar. The main area is divided into two columns. The left column contains 'Sender' and 'Firm Details' sections. The 'Sender' section has fields for Name (Anastasia Erikson), Title (Analyst), Firm (Bloomberg LP), Email (aaerikson56@bloomberg.net), Phone (+1-211-668-7901), and Focus. The 'Firm Details' section has fields for Institution Type (Hedge Fund Mngr), Style/Strategy (Multiple Strategy), Avg Hold Pd. (Yrs) (32), and Firm AUM (USD, 28). The right column contains a 'Message' section with a 'Request Type' dropdown (set to 'Call') and a 'Proposed Date' field (set to '08/02/21'). Below these fields is a text area containing the message: 'I would appreciate the opportunity to speak with you on Mon Aug 02 2021 or at your earliest convenience.' At the bottom of the window, there is a red text prompt: '*Required fields For requests to update data on the terminal, type HELP HELP <GO>'. Below this prompt are four buttons: '1 Send', '2 Preview', '3 History', and 'Cancel'.

Note: You can click the *History* button to check the status of your outgoing IR requests and follow up via message with the company's IR officer.

- 3. From the *Request Type* drop-down menu, request to call or meet with the company's investor relations officer.

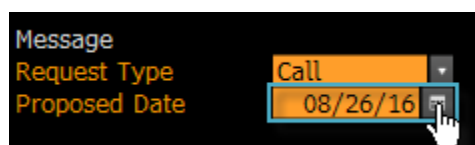

Message

Request Type Call

Proposed Date

I would appreciate the opportunity to speak with you at your earliest convenience.

4. In the *Proposed Date* field, enter a date on which you would like to speak to the investor relations officer.

Message

Request Type Call

Proposed Date 08/26/16

The *Message* section updates with your proposed date.

5. Click the **Send** button.

The message is sent to the *Bloomberg Message* (MSG) inbox of the company's investor relations officer.

Charts

The following charts provide enhanced views of the data that appears in DES and allow you to analyze historical data and analyze trends.

Accessing Price Charts

On the *Profile* tab, you can access the *Line Chart* (GP) function to perform additional charting analysis and compare price performance to other securities and indicators over time.

To display an advanced chart for the security, click the **Price Chart | GP** header.

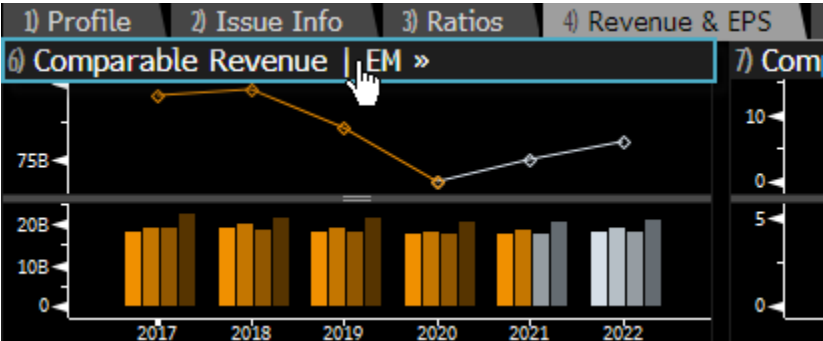

The *Line Chart* (GP) function appears. For more: [GP Help Page](#).

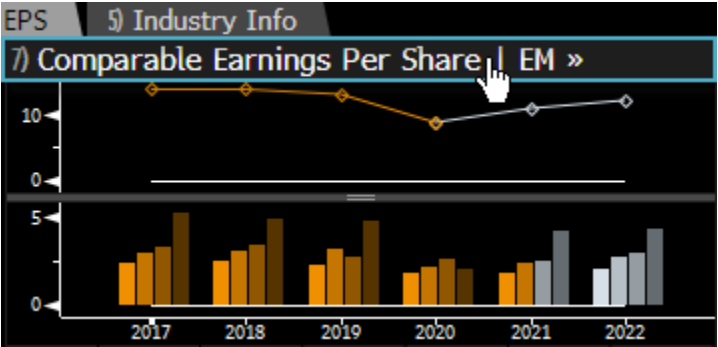

Revenue and EPS Charts

On the *Revenue & EPS* tab, the revenue and earnings per share (EPS) charts display line and bar chart views of the company's revenue and EPS performance, respectively. The horizontal x-axis displays the year; the vertical y-axis displays revenue or earnings performance. The line chart displays yearly performance and the bar chart displays quarterly performance. Each bar represents a quarter. Amber indicates reported values; gray indicates estimated values.

- To access the *Earnings Trends* (EM) function for further analysis of the company's revenue performance, click the **Comparable Revenue | EM** header.

- To access the *Earnings Trends* (EM) function for further analysis of the company's earnings per share information, click the **Comparable Earnings Per Shares | EM** header.

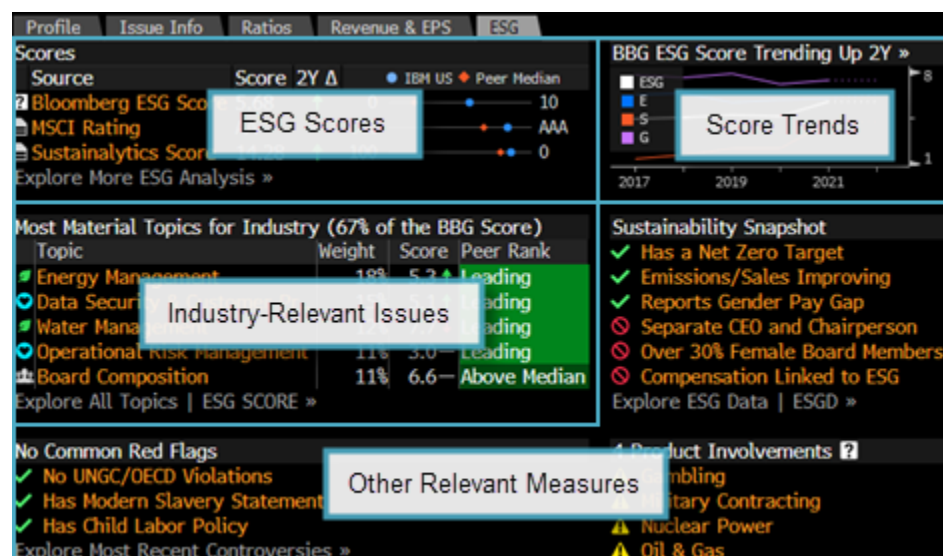

For more: [EM Help Page](#).

ESG Data

DES provides environmental, social, and governance data to help you assess a security's sustainability profile. The following topics provide details.

ESG Tab

The ESG tab provides an overview of a company's environmental, social, and governance-related data, so you can quickly assess whether it meets your sustainability criteria.

[Hint] Each section gives you quick access to more data in another function. For example, click **Explore More ESG Analysis** for in-depth analytics in the *ESG Analytics* (ESG) function.

- **ESG Scores:** Get a snapshot of the company's ESG performance absolutely and relative to peers as measured by Bloomberg and third-party metrics. For more: [Bloomberg ESG Scores](#), [BESG Help Page > Third Party Content](#).
- **Score Trends:** Find out whether the company is improving on its key ESG metrics.
- **Industry-Relevant Issues:** Review the top five topics facing the company's industry and gauge whether the company is leading or trailing its peers on those issues.
- **Other Relevant Measures:** See if there are any other concerns you need to be aware of before recommending or investing in the company.

Bloomberg ESG Scores

In the Scores section of the ESG tab, you can review Bloomberg's proprietary ESG scores to help you assess company

disclosure and performance on a wide range of environmental, social, and governance risks and opportunities. The scores measure a company's management of financially material ESG issues, i.e. those that can have a negative or positive impact on a company's financial performance. Bloomberg identifies financially material issues based on proprietary research, which is shared transparently and is based on an assessment of probability, magnitude and timing of impact.

Bloomberg's ESG scores are quantitatively driven and based solely on data reported by companies, with fully transparent methodologies and underlying data, and can be seamlessly integrated across the Bloomberg Terminal® and into custom analyses.

For transparency into the methodology and data underlying Bloomberg ESG Scores: [BESG Help Page > Bloomberg Scores Overview](#), [ESG Scores Methodology Overview](#) (PDF).

Product Involvements

In the *Product Involvements* section, you can review the company's participation in potentially controversial business areas.

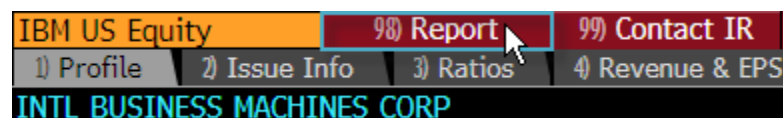

The business areas identified are driven by the Sustainalytics *Product Involvement* score, which provides details on how a company is involved in particular business areas and the degree of involvement, generally based on revenue data. For more: [Fact Sheet: Sustainalytics Product Involvement](#) (PDF).

For details on the methodology used to create the scores in each business area: [Sustainalytics Product Involvement Score Mapping](#) (XLS).

Running Reports

You can run a report to generate a PDF document with all of the data that appears in DES. This provides convenient access to the data for offline reference and printing.

To run a report, on the toolbar, click the **Report** button.

The report opens in Adobe® Reader.

Setting Equity Defaults

You can configure defaults for DES and other equity-related functions by using the *Personal Defaults for Equities* (PDFE) function.

To configure DES default settings, enter **PDFE <GO>**.

The *Personal Defaults for Equities* (PDFE) function appears.

For more on using PDFE: [PDFE Help Page](#).

Related Analytics

You can access related functions or data transparency to deepen your analysis of the data that appears. The following topics explain how to perform further analysis and gain additional context on your data.

Related Functions

On the *Ratios* tab, you can access related functions or chart the data for each section in the *Graph Fundamentals* (GF) function.

To display related functions:

- To display a list of related functions relevant to a data point, click any value.

Growth Potential		Profitability
Dil EPS Frm Cont Op 1...	-31.1%	EBITDA
Cap 1Y Gr	-2.2%	EBIT
BPS 1Y Gr	-1.8%	OPM
R&D To Sl	8.6%	Prtx Mrgn
Retntn Rt	N.A.	ROA
Rev - 1 Yr Gr	-4.6%	ROE
Empl 1Y Gr	0.6%	ROC
Ast 1Y Gr	2.5%	Ast TO

The *Related Functions* window appears. Click a function in the list to perform further analysis on the value. For more information on the function that appears, see the corresponding <Help> page.

- To chart all of the values in a section in GF, click the chart icon next to the function header.

Growth Potential		Profitability
Dil EPS Frm Cont Op 1...	-31.1%	EBITDA
Cap 1Y Gr	-2.2%	EBIT
BPS 1Y Gr	-1.8%	OPM
R&D To Sl	8.6%	Prtx Mrgn
Retntn Rt	N.A.	ROA
Rev - 1 Yr Gr	-4.6%	ROE
Empl 1Y Gr	0.6%	ROC
Ast 1Y Gr	2.5%	Ast TO

The *Graph Fundamentals* (GF) function appears, with all of the fields from the selected section listed. For more: [GF Help Page](#).

Accessing Equity Float

On the *Profile* tab, for the shares outstanding/float data, you can access the calculation and components of the equity float.

To access equity float data, click the **Shrs Out/Float** data cell.

52 Wk H (06/10/21)	152.84
52 Wk L (10/28/20)	105.92
YTD Change/%	14.09/11.19%
Mkt Cap (USD)	125,066.4M
Shrs Out/Float	893.5M/892.4M
SI/% of Float	24.4M/2.73%
Days to Cover	6.1

The *Float Transparency* window appears.

Note: Float represents the number of shares that are available to the public. The *Float Transparency* window displays the individuals or stagnant shareholders who are not included in the float calculation. Stagnant shareholders include [ESOPs](#), [ESOTs](#), [QUESTs](#), employee benefit trusts, as well as, corporations not actively managing money, venture capital companies, and shares held by governments.

Reference

Colors and Symbols

The following tables list the colors and symbols that appear on the different pages in DES.

Issue Info

Color/Symbol	Indicates
C	In the <i>Public Offerings</i> section, a common stock offering.
I	In the <i>Public Offerings</i> section, an initial public offering.
F	In the <i>Public Offerings</i> section, a follow-on offering.

Ratios

Color/Symbol	Indicates
Amber	Values are from the end of the previous fiscal year.
Yellow *	Values are from end of the last quarter.
Orange ~	Current 12-month trailing values.

Revenue & EPS

Color/Symbol	Indicates
Amber bar 	Reported quarterly values.
Amber line	Reported yearly values.
Gray bar 	Estimated quarterly values.
Gray line	Estimated yearly values.
Green bar 	Longer green bars indicate higher revenue values.

Industry

Color/Symbol	Indicates
Blue circle 	The value in the range chart for the current security.
Orange diamond 	The median value in the range chart for the current security's industry peers.

Shortcuts

To access DES, enter **(ticker) (exchange code) <Equity> DES <GO>**.

For example:

- F US <Equity> DES <GO> (Stock)
- IBM US 08/20/11 C175 <Equity> DES <GO> (Equity Option)

The *Description* screen appears with information about the equity.

Excel Integration

You can transfer DES data for an equity to a Microsoft® Excel spreadsheet by creating custom API formulas.

API Formulas

Formula Construction

You can create custom API formulas within Microsoft® Excel, so you can analyze one or more equities at once in a spreadsheet as you would on DES. Custom formulas also allow you to tailor the data to only the most relevant information for your analysis.

You can use BDP and BDS formulas to import DES data into Excel.

- For more on constructing BDP, BDS, and other API formulas: [DAPI Help Page](#), [Bloomberg API - Tutorial with Examples spreadsheet](#).
- For more on searching for data fields to use in formulas: [Finding Fields on FLDS](#), [Finding Fields on DES](#).
- For examples of formulas you can create: [Example: Description](#), [Example: Market Cap](#), [Example: Price to Sales](#), [Example: Address](#), and [Example: Executive Officers](#).

Finding Fields on FLDS

BDP and BDS formulas are created with data fields from the *Field Search* (FLDS) function.

Steps:

1. In Bloomberg, load one of the equities you are using. For example, enter **AAPL US <Equity> <GO>**.
2. Enter **FLDS <GO>**.

FLDS appears.

3. In the **Enter Query** field at the top left of the screen, enter the type of data you are looking for, such as "company description", then press <GO>.

AAPL US Equity		Source	Calcrtr
Search for Fields		Selected Fields (0)	
company description		View	Ranked ▾
	ID	Mnemonic	
1) ■	DS318	CIE_DES	
2) ■	DS319	CIE_DES_BULK	

Note: For more on searching on FLDS: [FLDS Help Page](#).

Fields that match your criteria appear in the search results. You can use any field that displays a value in the *Value* column.

4. In the search results, click a field.

AAPL US Equity		Source	Calcrtr	Save	Options	Page 1/4	Field Search
Search for Fields		Selected Fields (0)					
company description		View	Ranked	Filter	Equity	Field Type	All
	ID	Mnemonic	Description	Ovrd Value			
1	DS318	CIE_DES	Company Description	Show Value...			
2	DS319	CIE_DES_BULK	Company Description Bulk	Show Bulk...			
3	DY004	CIE_DES_BULK_JAPANESE	Company Description Bulk in Japanese	Show Bulk...			
4	DY005	CIE_DES_BULK_CHINESE_TR	Company Description Bulk in Chinese T...	Show Bulk...			

The field's definition appears.

Finding Fields on DES

You can also locate data fields to use in API formulas directly on DES.

To find a data field on DES, position your mouse over the label of a data value.

Px/Chg 1D (USD)	139.97/+1.49%
52 Wk H (06/10/21)	152.84
52 Wk L (10/28/20)	105.92
YTD Chg	.19%
Mkt Cap	6.4M
Shrs Out/Float	893.5M/892.4M
SI/% of Float	24.4M/2.73%
Days to Cover	6.1

52 Week High

Excel Field ID: HIGH_52WEEK

Field: HS001

The data field's mnemonic appears, which you can use in an API formula.

Example: Description

This topic provides a practical example for creating a formula to import DES data for an equity into Microsoft® Excel.

You want to download the company description of Apple Inc. (AAPL US <Equity>) that appears on DES.

Steps:

- 1. On FLDS, search for "company description" by loading the equity (AAPL US <Equity>) and following the steps in [Finding Fields on FLDS](#).

AAPL US Equity		Source	Calcrtr
Search for Fields		Selected Fields (0)	
company description		View	Ranked
	ID	Mnemonic	
1)	DS318	CIE_DES	
2)	DS319	CIE_DES_BULK	

In the search results, you see the field CIE_DES_BULK.

Note: In the search results, the *Value* column for this field displays "Show Bulk Data". This indicates that the field must be used in a BDS formula.

2. In a cell on your spreadsheet, use the field to create a BDS formula:

```
=BDS("AAPL US EQUITY","CIE_DES_BULK")
```

Note: This formula imports the description into multiple rows on your spreadsheet. If you want to import the company description into a single cell, you can use the field CIE_DES in a BDP formula. For example, =BDP("AAPL US EQUITY","CIE_DES").

The description appears in your spreadsheet.

Example: Market Cap

This topic provides a practical example for creating a formula to import DES data for an equity into Microsoft® Excel.

You want to download the current market cap of Nike (NKE US <Equity>).

Steps:

1. Enter **NKE US <Equity> DES <GO>**.

DES appears.

2. Position your mouse over the *Mkt Cap* data value.

YTD Change/%	14.09/11.19%	5Y Net Growth	4.26%
Mkt Cap (USD)	125,066.4M	Cash 05/07/21	1.64
Shrs Out/Float	893.5M/892.5M		
SI/% of Float	24.4M/2.7		
Days to Cover			
Suggested Functions	GPO Track the op	Current Market Cap Excel Field ID: CUR_MKT_CAP Field: RR902 Click for Market Capitalization, Enterprise Value.	

The field mnemonic for current market cap appears (CUR_MKT_CAP).

3. In a cell on your spreadsheet, use the field to create a BDP formula:

```
=BDP("NKE US Equity","CUR_MKT_CAP")
```

The current market cap appears in your spreadsheet.

Example: Price to Sales

This topic provides a practical example for creating a formula to import DES data for an equity into Microsoft® Excel.

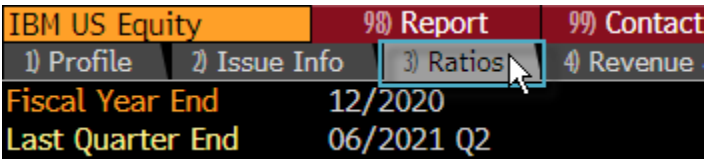

You want to download the price to sales ratio for Apple (AAPL US <Equity>).

Steps:

- 1. Enter **AAPL US <Equity> DES <GO>**.

DES appears.

- 2. At the top of the screen, select the *Ratios* tab.

The *Ratios* tab appears.

- 3. Position your mouse over the *P/S* label.

The field mnemonic for the price to sales ratio appears (PX_TO_SALES_RATIO).

- 4. In a cell on your spreadsheet, use the field to create a BDP formula:

=BDP("AAPL US Equity","PX_TO_SALES_RATIO")

The price to sales ratio appears in your spreadsheet.

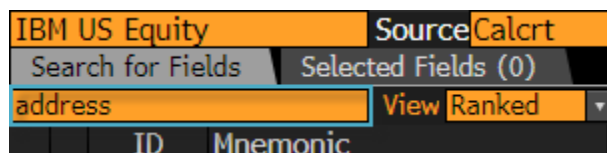

Example: Address

This topic provides a practical example for creating a formula to import DES data for an equity into Microsoft® Excel.

You want to download IBM's (IBM US <Equity>) address of the company headquarters.

Steps:

1. On FLDS, search for "address" by loading the equity (IBM US <Equity>) and following the steps in [Finding Fields on FLDS](#).

In the search results, you see the field COMPANY_ADDRESS.

Note: In the search results, the *Value* column for this field displays "Show Bulk Data". This indicates that the field must be used in a BDS formula.

2. In a cell on your spreadsheet, use the field to create a BDS formula:

```
=BDS("IBM US EQUITY","COMPANY_ADDRESS")
```

The company address appears in your spreadsheet.

Example: Executive Officers

This topic provides a practical example for creating a formula to import DES data for an equity into Microsoft® Excel.

You want to download the executive officers of Citigroup (C US <Equity>).

Steps:

1. On FLDS, search for "officers" by loading the equity (C US <Equity>) and following the steps in [Finding Fields on FLDS](#).

In the search results, you see the field COMPANY_EXEC_OFFICERS.

Note: In the search results, the *Value* column for this field displays "Show Bulk Data". This indicates that the field should be used in a BDS formula.

2. In a cell on your spreadsheet, use the field to create a BDS formula:

```
=BDS("C US Equity","COMPANY_EXEC_OFFICERS")
```

The executive officers appear in your spreadsheet.

Definitions

Term	Definition
# of Buyers/Sellers	The number of institutional buyers and sellers.
# of Institutional Owners	The total number of institutional owners.
% Held by Insiders	The percentage of shares held by insiders.
% of DRs mkt cap to company mkt cap	The percentage of the depositary receipts' market capitalization to the total market capitalization of the company.
% of DRs to underlying shrs out	The percentage of depositary receipts' outstanding relative to the total shares outstanding for the company as a whole. Calculated as: [(Current DRs Outstanding * Shares Per ADR) / (Current Shares Outstanding for the Underlying Ticker)] * 100
% Tot Rev	The percentage of the company's total revenue that was generated in its primary industry.
12M Total Ret	The total one-year percentage return.
52 Wk H	The highest value the security reached in the past 52 weeks and the date on which it occurred.
52 Wk L	The lowest value the security reached in the past 52 weeks and the date on which it occurred. The date flashes in red if a stock reaches a 52-week high or low during the current trading session.
A/R Trnovr	The accounts receivable turnover is calculated as the trailing 12-month net sales divided by the average of accounts receivable and notes receivable.
Act Funds/Total	For private equity firms, the ratio of the firm's active private equity funds to its total number of private equity funds.
Act Invst/Total	For private equity firms, the ratio of the firm's active private equity investments to its total number of private equity investments.
ADR	The American Depositary Receipt, which is a receipt that represents foreign shares of stock held on deposit in an American bank. Receipts are denominated in U.S. dollars and traded on American exchanges.
Amt	The value or ratio of the declared dividend.
Ann Date	The expected earnings announcement date and type. If the announcement date is today, it flashes in red.
Asset Turnover	The asset turnover is calculated as net sales divided by average total assets. Average is the average of the beginning balance and ending balance.
Assets - 1 Yr Growth	The total assets for the current period divided by the total assets for the prior period, minus 1, and then multiplied by 100.
BBGID	The Bloomberg identification number.
Beta vs. (index)	The equity's adjusted beta against its relative benchmark index. Adjusted beta is derived from historical data but modified by the assumption that a security's beta moves toward the market average over time. Adjusted beta = (.67) * Raw beta + (.33) * 1.0.

Term	Definition
Bk Val Per Sh	The book value per share (growth, in percentage), calculated using the following formula: $((BVCP - BVPP)/BVPP) * 100$ - Where: BVCP is Book Value per Share for the current period. BVPP is Book Value per Share for the previous period.
BVS - 1 Yr Growth	The book value per share for the current period divided by the book value per share for the last period, minus 1, and then multiplied by 100. This is one measure of determining a company's growth potential.
C	In the <i>Public Offerings</i> section of the <i>Issue Info</i> page, indicates a common stock offering.
Capital - 1 Yr Growth	The capital for the current period divided by the total capital for the last period, minus 1, and then multiplied by 100.
Cash Gen/Cash Req'd	The cash from operations divided by capital expenditures and dividends paid from common and preferred shares. For utilities, the formula is altered to equal: Cash from operations/ (((Capital Expenditures + Dvd Paid)*(-1)) + Dvd Paid).
CF/NI	The cash from operations divided by net income (losses).
CFO/Sales	Cash from Operations/Sales (in percentage), which is calculated using the following formula: [Cash from operations / Net Sales] x 100.
Common	The nine-digit identification code assigned jointly by CEDEL and Euroclear.
Common Stock	A security that represents ownership in a corporation.
CPS	The Cashflow per share, which is calculated as (Cash From Operations)/(Basic Avg # of Shares Outstanding).
Curr EV	The Current Enterprise Value, which is calculated as Market Capitalization + Preferred Equity + Minority Interest + Short-Term and Long-Term Debt - Cash and Equivalents - Nominal Amount of Debt Included in Price.
Curr EV/T12M EBITDA	The Current Enterprise Value divided by Trailing 12 Month EBITDA.
Curr P/FCF	The current price divided by the free cash flow per share. Free cash flow per share is cash from operations minus capital expenditures divided by the average number of shares outstanding. Note: If free cash flow is negative, Price/FCF cannot be computed.
Curr Ratio	A company's current assets divided by its current liabilities, which provides a measure of liquidity.
Curr Shares Out	The total current number of shares outstanding obtained from annual, semi-annual, and quarterly reports, Edgar filings, press releases, and stock exchanges. The data value for this field in the <i>Data Field Finder</i> (FLDS) function is DS124. For more: FLDS Help Page .
Currency	The currency in which the security is traded.

Term	Definition
Days to Cover	The short interest ratio (SIR), which is the number of days it would take to cover all current short positions based upon the daily average trading volume, assuming all transactions are used to cover outstanding short positions. The ratio is derived from taking the number of short positions outstanding and dividing that by the daily average trading volume.
Debt/Assets	The short term borrowings plus the long term borrowings plus securities sold with repo agreements, divided by the total assets, and then multiplied by 100.
Debt/Com Eq	The total debt to common equity (in percentage), calculated using the following formula: $[\text{ST Borrowings} + \text{LT Borrowings} / \text{Total Common Equity}] \times 100$.
Dil EPS frm Contin Ops	The percentage growth, which is calculated by the following formula: $[\text{Diluted EPS from continuing operations (current minus prior period)} / \text{Diluted EPS from continuing operations (prior period)}] \times 100$.
Dividend Yield	The annual dividends per share divided by the price per share, expressed as a percentage.
DPS	The latest reported annual dividend per share.
Dvd Ind Yld	The most recently announced net dividend, annualized based on the Dividend Frequency, then divided by the current market price.
Dvd P/O	The payout ratio (in percentage), calculated by the following formula: $[\text{Cash Common Dividends} / \text{Income bef XO} - \text{Minority Interest} - \text{Cash Pref Dvd}] \times 100$.
EBIT	Earnings before interest and taxes
EBIT/Tot Int Exp	The earnings before interest and taxes divided by the total interest expenses.
EBITDA	Earnings Before Interest, Taxes, Depreciation and Amortization
Effective Interest Rate	The total interest expense divided by the average of borrowings and then multiplied by 100.
Employees	The total number of employees at the company as of the specified date. For Japanese companies, the number that appears is based on parent company data.
Employees - 1 Yr Growth	The number of employees for the current period divided by the number of employees for the last period, minus 1, and then multiplied by 100. Note: This field appears when there are no LT Growth and Est PEG fields.
EPS T12M	In the U.S. and Canada, this field represents the trailing 12-month diluted EPS from continuing operations. In South Africa, it represents the trailing 12-month special EPS. In all other countries, this field represents trailing 12-month basic earnings per share before extraordinary items.
ESOPs	Employee stock ownership plan.
ESOTs	Employee share ownership trust.
Est EPS	The company's estimated total earnings divided by the number of outstanding shares of common stock. Note: The estimates and dates are provided by Best and Toyo Keizai for Japanese companies, and Bloomberg for all others.

Term	Definition
Est P/E	The estimated price to earnings ratio, which equals the security's current price divided by the next estimated earnings per share. Note: The estimates and dates are provided by Best and Toyo Keizai for Japanese companies, and Bloomberg for all others.
Est PEG	A company's Bloomberg Estimated P/E ratio for the specified period divided by the company's Bloomberg Estimated Long Term Growth (LTG) rate.
Exchange	The primary exchange on which the security trades.
Ex-Date	The first date on which a security is traded without entitling the buyer to receive distributions previously declared.
F	In the <i>Public Offerings</i> section of the <i>Issue Info</i> page, indicates a follow-on offering.
FCF/Basic Sh	The free cash flow per share. This is equal to free cash flow divided by the average number of shares for the period. Free cash flow is from operations minus capital expenditures.
FY Rev	The latest annual revenue generated by the company in its primary industry.
GM	The gross margin (in percentage), which is calculated using the following formula: $[\text{Net Sales} - \text{Cost of Goods Sold} / \text{Net Sales}] \times 100$.
I	In the <i>Public Offerings</i> section of the <i>Issue Info</i> page, indicates an initial public offering.
Incorp.	The country where the company is incorporated.
Ind Gross Yield	The annualized gross dividend divided by the current market price.
Inv Turnover	A ratio that reveals the number of times a firm sells and replaces its inventory during a given period. A low turnover rate indicates excess inventory or ineffective buying or sales policies.
ISIN	The International Securities Identification Number, which is a number, assigned by the local numbering agency, developed to facilitate cross border transactions. It consists of a two or three letter prefix that identifies the country of the issuer, followed by the nine-digit national security ID and a check digit.
Last Px	The last price for the security.
Lead Manager	The commercial or investment bank with the primary responsibility of organizing syndicated bank credit, negotiating terms of the issue, and assessing market conditions.
Level	The trading level of the depository receipt. The four different levels are Level 0, Level I, II and III. Level 0 is for unspecified level. Level I programs trade over the counter. Levels II and III are listed on an exchange, but only Level III can conduct an initial public offering.
LT Growth (3 or 5)Y	The compounded dividend growth rate for a three- or five-year period.
MIC	The ISO market identification code. This code is created by the Society for Worldwide Interbank Financial Telecommunications (SWIFT).
Mkt Cap	The market capitalization, which is the company's worth calculated by multiplying the shares outstanding by the price per share.

Term	Definition
Mkt Cap * (currency)	The market capitalization, which is the company's worth calculated by multiplying the shares outstanding by the price per share. The currency in which the security is traded appears to the right of the red star.
NAICS	The North American Industry Classification System number.
Net Change Last 6M	The percent change in the holdings by insiders over the last six months.
OPM	The opening margin, which is calculated as the operating income (losses) divided by the net sales or total revenue, then multiplied by 100. Note: Either the Trailing 12mo EPS or Fiscal Year EPS is used. "neg" indicates the P/E ratio value is negative.
Option	A contract that provides the right to buy a specific number of shares within a particular time period at a specific price.
P/B	The ratio of a stock's price divided by the book value per share.
P/CF	The current price divided by the cash flow per share. Note: If the cash flow is negative, Price/Cashflow is not computed.
P/E	The ratio of a company's security price to its earnings per share. It is calculated by dividing the stocks' market price by the company's earnings per share.
P/S	The ratio of the stock's price to sales. It is calculated by dividing total market capitalization by net sales. The price/sales ratio is useful in that it allows you to make comparisons of all firms, including those that are unprofitable.
PAR (currency)	The nominal dollar amount assigned to the security by the issuer. For equities, par is usually a very small amount that bears no relationship to its market price.
Preferred	Stock shares that represent a portion of ownership in a company, with the shares normally carrying fixed dividends.
Pretax Mrgn	Pretax income (or losses) divided by net sales or total revenue, then multiplied by 100.
Px/Chg 1D	The last price/one-day percent change.
Quests	Qualifying employee share ownership trust.
Quick Ratio	Also called the acid ratio, this figure gauges a company's short-term liquidity by dividing its current liabilities into its cash, cash equivalents, and account receivables.
R & D to Sales	Research and development expenditures divided by net sales and then multiplied by 100. This is one measure of determining a company's growth potential.
REIT	A real estate investment trust that takes an ownership position. Investors profit from rental income and appreciation.
Retention Ratio	The percentage of a company's profits after taxes that have been paid that can be credited to its retained earnings.
Rev - 1 Yr Gr	The net sales for the current period divided by the net sales for the last period, minus 1, and then multiplied by 100.

Term	Definition
Rev/BEPS	The sales per share, calculated as (Net Sales)/(Basic Average # of Shares for the period).
ROA	The measure of a company's profitability, determined by dividing its net income by total assets.
ROC	Earnings to capital divided by the average of total capital and then multiplied by 100.
ROE	The net income divided by shareholder's equity.
Sec Type	Indicates the type of stock.
Sector	Appears for securities listed on the London Stock Exchange. The market sector to which the security belongs.
SEDOL1	The seven-digit Stock Exchange Daily Official List number issued by the London Stock Exchange. The first digit identifies a specific region.
Segment	Appears for securities listed on the London Stock Exchange. The market segment to which the security belongs. A market segment is a division of the market characterized by specific rules that govern trading activities. The rules can affect the market segment as a whole or be grouped within market sectors as a schedule of periods, each coming into effect at pre-defined times during the trading day.
Shares Out/Float	The percentage of shares outstanding and free float held by all institutions.
Short Int	The total number of shares that have sold short and have not yet been repurchased. The figure is published monthly by the New York Stock Exchange and gives an indication of how many investors think that the stock price will fall. For more on using the <i>Short Interest</i> (SI) function to analyze short interest for an equity security: SI Help Page .
Shrs Out/Float	The total current number of shares outstanding obtained from annual, semi-annual, and quarterly reports, Edgar filings, press releases, and stock exchanges and percentage of those shares available to the public. For more: FLDS DS124 .
SI/% of Float	The short interest as a percent of equity float. Calculated as: Short Interest / Equity Float * 100.
SIC Code	The SEC industry classification, which indicates the company's industry group.
Sicovam	The official six-digit French identification number, also known as the French number. The Societe Interprofessionnelle pour la Compensation des Valeurs Mobilières.
T12M Dil EPS	The company's total earnings (net profit minus its preferred stock and bond obligations) for the previous fiscal year divided by the number of outstanding shares of common stock.
Trailing 12M EPS	The company's total earnings (net profit minus its preferred stock and bond obligations) for the trailing twelve months divided by the number of outstanding shares of common stock.
Unrealized Value	The estimated value of the investments currently held in the fund. Currently applicable to private equity funds only.
Valoren	The nine-digit number assigned by Telekurs. It is the official identification number in Switzerland.

Term	Definition
WPK #	The six-digit German identification number, Wertpapier Kenn-Nummer.
XO	Indicates that the calculation to derive the data is using numbers before "extraordinary items" are calculated. One-time rare occurrences that may skew data are factored out.
YTD Change/%	The year-to-date net change divided by the year-to-date percentage change.

Global Data

How do I find the share class of a fund?

To identify the share class of a fund, enter the ticker followed by DES <GO>. For example, enter [PEF4284 BZ <Equity> DES <GO>](#). The share class appears at the bottom of the screen in the *Share Class* field.

The possible share classes are:

- Accredited Investor
- Exclusive
- Exclusive Professional Investor
- Exclusive Qualified Investor
- Institutional
- Insurance
- Life Assurance
- Pension
- Professional Investor
- Professional Investor, Reserved
- Qualified Investor
- Qualified Investor, Reserved
- Qualified Purchaser, Reserved
- Retail
- Wholesale
- Superannuation

What is "float"?

Float is the number of company shares that are freely traded (i.e., the number of shares available to the public). For a given company, this figure is calculated by subtracting the number of shares held by insiders and stagnant shareholders from the total number of shares outstanding. Float may be expressed as a number or percentage, depending on the function.

What is the difference between the market cap figure in the data field Index Market Capitalization (IN089, INDX_MARKET_CAP) versus the figure in Current Market Cap (RR902, CUR_MKT_CAP)?

The Index Market Cap field (IN089), which appears in functions such as *Financial Analysis* (FA), represents the aggregation of constituent market values. The index market cap calculation is the Index Last Price (PR005, PX_LAST) multiplied by the Index Divisor (IN018, INDX_DIVISOR). The index market cap field is disabled for indices with hidden divisors. The index divisor is adjusted when capitalization amendments, such as the addition/deletion of stocks or corporate actions, are made to the constituents of the index, allowing the index value to remain invariably comparable.

The Current Market Cap (RR902, CUR_MKT_CAP), which appears in functions such as *Security Description* (DES), is the summation (total market value) of all the companies' outstanding shares, as stated in the pricing currency of the index. The current market cap represents the market size of a given security basket, a figure that is not redefined by the weight of the securities in the index. Meanwhile, the index market cap value accounts for the constituents weighting distribution in the index.

Where can I find a fund's benchmark?

A fund's benchmark appears in the *Security Description* (DES) function. Blended benchmarks appear in the *Notes* section of the *Organizational* tab, accessible via [DES4 <GO>](#) (e.g., [HLGAPIF MK Equity DES4 <GO>](#)). All other benchmarks, when available, appear in the *Comparative Returns* section of the *Profile* tab.

Who is sending me data for a particular fund?

To see whether a fund house, administrator, custodian, exchange, or third party vendor sent you data for a particular fund, do either of the following:

- Enter FLDS FD046 <GO>. The source of the data appears in the *Value* column for FUND_PRICING_SOURCE.
- Enter DES1<GO>. The source of the data appears at the bottom-left of the screen, next to *Px Source*.

Note: For ETFs, you must enter DES5<GO> to find the data source.

Why do some equity tickers have a CINS number instead of a CUSIP number?

A CINS number is the equivalent of an international CUSIP number, therefore if a ticker has a CINS number, it does not have a CUSIP number. Bloomberg does not display a CINS number unless it represents the U.S. List of the related security's foreign shares.

You can perform additional analysis on CINS-identified securities:

- To look up a security using a CINS number, enter ID <GO> to access the *ID Lookup* function.
- To see the CINS number for a U.S. ticker, enter DES <GO> to access the *Security Description* function. For example, enter WLTW US <Equity> DES <GO>. From the top of the screen, select the Issue Info tab.

Note: The CINS number cannot be downloaded into Microsoft Excel.

Why is my fund missing from the Bloomberg website?

Neither hedge funds nor funds open to institutional investors are available on the Bloomberg website. Bloomberg does not publish restricted information that can be seen by clients who may not be accredited to view it.

To see if a fund is open to institutional investors, enter the fund ticker followed by FLDS FD534 <GO>. For example, enter PREVIIC SM Equity FLDS FD534 <GO>.

If the value for the field FUND OPEN INVESTOR SHR is "Institutional," the related fund is not available on the Bloomberg website.

Why is there no value for the data field ID_EXCH_SYMBOL for a security?

For a value to appear in the ID_EXCH_SYMBOL (EX005) data field, the security must be active and currently pricing. Therefore, if the MARKET_STATUS (PR286) data field displays DLST (delisted), ACQU (acquired), PEND (pending listing), or PRNA (there is no pricing), there may be no ID_EXCH_SYMBOL value for the security.

Additionally, some exchanges do not currently support the ID_EXCH_SYMBOL field. These are:

- BG: Botswana Exchange
- EC: Egyptian Exchange
- EI: Nile Stock Exchange
- GS: Stuttgart Stock Exchange
- IQ: Iraq Stock Exchange
- KH: Cambodia Stock Exchange
- MW: Malawi Stock Exchange
- PB: Port Moresby Stock Exchange
- RW: Rwanda Stock Exchange
- SD: Swaziland Stock Exchange
- SU: Sierra Leone Stock Exchange
- SY: Damascus Securities Exchange
- UG: Uganda Securities Exchange
- ZH: Zimbabwe Stock Exchange

Additional FAQs

How can I calculate the two-month price change for a stock in Excel?

You can calculate the price change over a custom time period using the data field `INTERVAL_PERCENT_CHANGE` or `INTERVAL_NET_CHANGE` in a Bloomberg Data Point (BDP) formula. You must also include the `CALC_INTERVAL` override.

The basic syntax for a BDP formula with an override is:

`=BDP("Ticker", "Data Field", "Data Field Override=Value")`

For example, to download the percent change in price for IBM for the last two months:

`=BDP("IBM US Equity", "INTERVAL_PERCENT_CHANGE", "CALC_INTERVAL=2M")`

For more: [DAPI Help Page > Overrides Description](#).

How do I find the country of incorporation for a security?

To see the country of incorporation for a security:

1. Enter the company ticker followed by DES <GO> to access the *Security Description* function. For example, enter [AAPL US <Equity> DES <GO>](#).
2. Select the *Issue Info* tab.
3. Review the *Incorp* field, which shows the country of incorporation.

What is Multiple on Invested Capital (MOIC)?

Multiple on Invested Capital (MOIC) is a performance indicator that shows how much more or less an investment is worth than when it was made.

MOIC is calculated as:

Total Value / Invested Capital

Take the next step.
